1955 ACP PAYMENTS

Financial help to farmers is available in 1955 through the Government Agricultural Conservation Program (ACP). Funds are available; payments will be quicker in 1955.

Requirements and regulations differ, County to County. To receive this aid, the farmer must consult his County ACP office. Many farmers may not be aware of this program. Urge your customers to call at their County ACP office to learn if they are eligible for participation. We suggest, you as a dealer get an outline of the program for your County, so as to be able to serve your customers better.

Where applicable, these funds in part will be used to help the farmer by sharing the cost of pasture seeds used in establishing new permanent pastures and cover crops. The individual ACP County Committees will prescribe the kind of seed mixtures for any specific field, or practice. Additionally where applicable, payments will be made for lime (for new, or old stands of legumes and grasses), and fertilizer (in connection with above payments).

Old pastures, thinned by drouth, need thickening up. A poor pasture is more a liability than an asset. . . . January is a good time to broadcast the smaller-seeded grasses and legumes, such as Timothy, Redtop, Bluegrass, Alsike, Lespedeza, Ladino. The alternate freezing and thawing will work the seed into the ground. . . . A little later, the large-seeded grasses, such as Brome, Orchard, Fescues, may be drilled in to a depth of 1/2 inch. Where possible, avoid broadcasting the lighter, larger-seeded grasses, as poor catches often result. . . . These renovated pastures under many of the ACP County programs will benefit from payments for lime application.

Good stocks of M BRAND seed are ready in all the needed items. See attractive wholesale prices below. Order your needs early. Be prepared for your farmers, when they come in to buy.

ALFALFA U. S. Verified Origin—

	Per 100 Lbs.

ADDRESS

1020 SO. FOURTH ST.
ST. LOUIS

Convenient location: just south of Municipal (Free) Bridge—near truck depots, railroads, wholesale district—out of congested area. Ample truck-loading space—**off the street**—with free parking lot. Two entrances—Fourth or Third St.—to platform which can serve 22 trucks at a time.

Railroad trackage alongside building. Bulk unloading provided for. Building contains 150,000 square feet. Newest types cleaning machinery, with arrangement for quick, efficient, economical handling and cleaning of seeds.

Large, modern, daylight seed-testing laboratory to control buying, cleaning and preparation of seeds to meet and surpass requirements of the Federal and various State seed laws.

St. Louis is close to the producing territory of a wide assortment of Grasses, Clovers, Beans, Peas and Forage seeds, enabling us to offer first-hand at low prices.

In addition, we operate our large cleaning and storage plant at Atchison, Kansas, for handling and cleaning seeds originating in that area and the West. Atchison is in the northeast corner of Kansas, just across the Missouri line, in the center of the Blue Grass producing districts of Missouri, Kansas, Iowa and Nebraska.
